EXPERIENCE

Software Developer

Refactory

06/2019 - 02/2020 Kampala, Uganda

A program tailored to make tech talents job-ready. Created in partnership with and for the tech sector in Uganda.

- Successfully facilitated daily scrum meetings for a team of 3 members.
- Integrated the front-end, back-end and database of the application.
- Modelled database for the application using MongoDB and hosted it on Cloud Atlas.
- Created Rest end points for the application and tested them using Postman.
- Developed user interfaces using VueJS.
- Designed mock ups using AdobeXD.

Software Developer

Personal Project (Face recognition)

02/2020 - 06/2020 Kampala, Uganda

- Integrated the front-end, back-end and database of the application.
- Consumed a third party facial recognition API for the application.
- Deployed application to Heroku cloud services.
- Developed application with React,
